

## **STEELCOR POWER ENVIRONMENTAL POLICY**

The business nature of Steelcor Power and workers is positive in regards to the offices, workplace and outside in the atmosphere, waterways and soil.

Air conditioners have been installed in all offices. The ventilation and temperature in the factory are stabilized by roof flues and horizontal blowing water-evaporation fans in the workplace.

The factory floor is kept clean by individual workers and floor sweepers.

Where required, safety gloves, goggles, welding helmets, welding aprons and everybody is supplied with safety boots.

Ear plugs are supplied.

In the workshop the water evaporation fans keep the temperature & humidity moderate.

Lighting in the offices and on computer screens is supplied by designed fluorescent lights.

All work is done under cover.

It is the policy of Steelcor Power to direct run-off water out of the drains directly into the storm water drains.

Steelcor Power's employees are given standing Instructions to do their work in line with the above policy.
